FEATURES

FUEL/EMISSIONS STRATEGY
- Meets most worldwide emissions requirements down to 500 mg/Nm³ NOₓ level without after treatment (contact factory for applications requiring 0.5g/hp-hr performance)

SINGLE-SOURCE SUPPLIER
- Generator set manufactured in ISO 9001:2000 compliant facility
- Package factory designed and production tested
- Generator set and components meet or exceed the following specifications: AS1359, AS2789, BS4999, DIN6271, DIN6280, EGSA101P, JEM1359, IEC 34/1, ISO3046/1, ISO8528, NEMA MG1-22

WORLDWIDE PRODUCT SUPPORT
- Cat® dealers provide extensive post sale support including maintenance and repair agreements
- Supported 100% by the Cat dealer with warranty on parts and labor

CAT G3516C ISLAND MODE GAS ENGINE
- Compact, four-stroke-cycle gas engine provides exceptional dependability, fuel economy and power density
- Robust kilowatt based air to fuel ratio control system yields enhanced system performance
- Designed for maximum performance on low pressure pipeline natural gas of 3-7 psi (0.21 kg/cm² - 0.49 kg/cm²) to the container with a methane number range of 55-100 (contact factory for methane numbers <55)
- Island mode feature improves engine’s capability to handle electrical loading and unloading

REDUCED ENVIRONMENTAL IMPACT
- 110% spill containment of onboard engine fluids
- Positive crankcase fumes ventilation

COOLING SYSTEM
- Horizontally mounted radiator with vertical discharge
- Sized compatible to rating with energy efficient electric drive fan and core.
- Provides 40C (104F) ambient capability with 500 mg/Nm³ NOₓ (1g/hp-hr) at 100% continuous rating before derate
- Variable frequency drive fan controls improve partial load fuel consumption

CAT GENERATOR
- Cat SR4B 826 frame generator designed to match the performance and output characteristics of the Cat gas engine
- Double bearing, wye-connected, static regulated, brushless, permanent magnet excited

ON PACKAGE CONTROL PANEL SYSTEM
- Provides auto paralleling using package mounted controls
- EMCP 4.2 offers engine and generator monitoring and protection
- PL1000E Controller
- Engine Advisor Panel
- AGC-4 provides paralleling, load sharing, VFD control, and primary generator protection
- Intertie protection provided via utility grade Basler BE1-11i utility multi-function relay (UMR)

DIGITAL VOLTAGE REGULATOR (CAT DVR)
- Three-phase sensing with adjustable volts-per-hertz regulation
- Provides precise control and constant voltage in the normal operating range.

SOUND ATTENUATED CONTAINER
- Provides 9-high stack CSC rated enclosure for ease of transportation and protection.
- Meets 72 dB(A) at 15 meters or below per SAE J1074 measurement procedure at continuous rating
**FACTOR Y INSTALLE D STANDAR D EQUIPMENT**

| Engine          | Cat G3516C Island Mode Gas Engine (Operates on 31.5 to 47.2 MJ/Nm³ (800 to 1200 btu/ft³) dry pipeline natural gas)  
Cat Engine Advisor Panel provides engine diagnostics and full text descriptions  
Cat Gas Engine Control Module (Cat GECM) includes electronic speed governor with hydraul actuator and provides transient richening and turbo bypass control  
Electronic Ignition System (controlled by ECM)  
Individual cylinder Detonation Sensitive Timing (DST)  
Engine installed electronic fuel metering valve  
Hydraulic actuated throttle plate electronically controlled by ECM  
Heavy duty, single element canister type air cleaner with service indicator  
Charging Alternator, 60-Amp  
Dual 24V electric starting motors  
Integral lube oil cooler, lube oil pump, oil filter, filler, and dipstick and oil drain lines routed to engine rail  
Prelube Pump, 24VDC continuous type  
Jacket Water Heater, 9kW, 400/480V, 50/60 Hz, 3-phase with isolation valves |
| Generator       | Double bearing SR-4B brushless, form wound, permanent magnet excited, three-phase with Cat digital voltage regulator (Cat DVR), space heater, 6-feed design, Class H insulation operating at Class F temperature for extended life, winding temperature detectors and anti-condensation space heaters (120/240V 1.2 kW). Generator equipped with System 4 insulation protection. |
| Containerized Module | 40' ISO high cube container, 9-high stack CSC certified  
Four (4) sound attenuated air intake louvers and 3 lockable personnel doors with panic release  
Interior walls and ceilings insulated with 100 mm of acoustic paneling  
Floor of container is undercoated for corrosion protection  
Side bus bar access door, external access load connection bus bars  
Shore power connection via distribution block connections for jacket water heater, battery charger, generator space heaters, and generator condensate heaters  
Six (6) DC lights  
3' ANSI flange customer fuel connection with cover to prevent vandalism  
Energized-to-run (ETR) shutoff valve (double solenoid, low/high pressure switch, CSA/FM approved)  
Cat Brand fuel filter, wall mounted and gas pressure regulator  
Lube oil level regulator with makeup tank  
Sound attenuated 72 dBA @ 15 m (50 ft)  
Four (4) oversized maintenance-free batteries, battery rack and 20-Amp battery charger  
Critical grade exhaust silencer with vertical discharge and single 2 m (6.5 ft.) stack  
Vibration isolators, stainless steel fastening hardware and hinges  
External drain access to standard fluids  
One 4.5 kg (10 lb) carbon dioxide fire extinguisher  
Standard Cat rental decals and painted standard Cat power module white  
LH and RH engine service panels integrated into container side walls  
110% spill containment system for on-board engine fluids |
| Cooling         | Standard cooling provides 40C (104F) ambient capability with 500mg/Nm³ NOx at 100% Continuous  
Horizontally mounted radiator with vertical air discharge  
Variable frequency drive (VFD) for optimal partial load fuel consumption |
| Generator Controls and Protection | Controls provide auto paralleling AGC-4 controller, CAN-bus, ethernet comm, PWM and analog outputs, legacy analog load sharing; includes PL1000E gas engine Advisor panel for operational/diagnostic information;  
Cabinet houses shore power transformer, distribution, protection, and internal/external power selector switch  
EMCP 4.2 genset mounted controller  
Automatic start/stop with cool down timer  
Generator Protection features: 25, 32, 40, 46, 47, 50/51, 27/59, 81 O/U  
Reverse compatibility for interface to legacy power modules  
3200A IEC rated generator circuit breaker with LSIG trip unit w/ammeter  
Multi-mode operation (island, multi-island and utility parallel), load sharing (multi-unit only)  
Manual and automatic paralleling capability  
Metering display: voltage, current, frequency, power factor, kW, WHM, kVAR, and synchroscope  
Basler BE1-111 is IEEE1547-2003 compliant in most applications |
| Quality         | Factory testing of standard generator set and complete power module  
UL, NEMA, ISO and IEEE standards  
Full package CE certification available  
O&M manuals |
## SPECIFICATIONS

### GENERATOR
- **Frame Size**: 826
- **Pitch**: 0.6667
- **No. of poles**: 4
- **Excitation**: Static regulated brushless PM excited
- **Insulation**: Class H
- **Enclosure**: Drip proof IP22
- **Temperature rise**: 105 deg C
- **Alignment**: Pilot shaft
- **Overspeed capability**: 125% of rated
- **Voltage regulator**: 3 phase sensing with Volts-per-Hertz
- **Wave form deviation**: Less than 3% deviation
- **Telephone Influence Factor (TIF)**: Less than 50
- **Harmonic Distortion (THD)**: Less than 5%

### CAT G3516C LOW EMISSIONS GAS ENGINE
- **Number of Cylinders**: V16
- **Bore – mm (in)**: 170 (6.7)
- **Stroke – mm (in)**: 190 (7.5)
- **Displacement – L (cu in)**: 69 (4,210)
- **Compression ratio**: 11.3:1
- **Engine Speed (rpm)**: 1500/1800
- **Aspiration**: Turbocharged Separate Circuit Aftercooled
- **Governor type**: ADEM™ A3 Control System
- **Combustion**: Low Emission
- **Fuel**: Natural Gas
- **Fuel Pressure Range (PSI)**: 3-7
- **Methane Number**: 3-7

LEHX0021-00 3
For derates less than 50%, refer to partial load operation section in OMM.
OVERALL PACKAGE DERATE GUIDANCE:

To determine the actual package rating at site conditions, one must consider, separately, limitations due to fuel characteristics and air system limitations. The Fuel Usage Guide deration establishes fuel limitations while the Altitude/Temperature deration factors and RPC (reference the Cat Methane Program) establish air system limitations. RPC is considered when the Altitude/Temperature deration is less than 1.0 (100%). Under this condition, add the two factors together. When the site conditions do not require an Altitude/Temperature derate (factor is 1.0), it is assumed the turbocharger has sufficient capability to overcome the low fuel relative power and RPC is ignored.

To determine the actual power available, take the lowest rating between 1) and 2) below:

1) Fuel Usage Guide Deration
2) 1-((1-Altitude/Temperature Deration) + (1-RPC))

</tbody>
</table>
**BUS BARS**
- Three phase, plus full rated neutral, bus bars are tin-plated copper with NEMA standard hole pattern for connection of customer load cables and generator cables.
- Bus bars are sized for full load capacity of the generator set at 0.8 power factor.
- Includes ground bus, tin-plated copper, for connection to the generator frame ground and field ground cable.

**VOLTAGE REGULATION AND POWER FACTOR CONTROL CIRCUITRY**
- Generator mounted automatic voltage regulator, microprocessor based
- Manual raise/lower voltage adjust capability and VAR/power factor control circuitry, all via AGC-4, for maintaining constant generator power factor while paralleled with utility
- Includes RFI suppression, exciter limiter and exciter diode monitoring

**CONTAINER**
- 40' ISO high cube container, CSC 9-High Stack Certified
- Painted standard Cat Power Module White per Caterpillar Specifications
- Standard air intake louvers
- Three (3) lockable personnel doors with panic release
- Fire extinguisher
- LH and RH engine service panels integrated into container side walls
- 110% spill containment system for on-board engine fluids

**CURRENT TRANSFORMERS**
- CT's rated 3500:5 with secondary wired to shorting terminal strip protection

**INTERNAL LIGHTING**
- Six (6) compact LED type internal DC lights with timers located at each personnel door
- One (1) duplex service receptacle

**AC DISTRIBUTION**
- 50/60 Hz Transformer distributes utility voltage or customer supplied line voltage, which is selectable via onboard switch, for the Power Module AC auxiliaries.
- Provides 240/120 VAC for all module accessories except Jacket water heater (400/480V). Includes controls to de-energize jacket water heaters and generator space heater when the engine is running

**BATTERY CHARGER AND BATTERIES**
- 24 VDC/20A battery charger with float/equalize modes and charging ammeter
- Four oversized maintenance free batteries

**EXHAUST SILENCER**
- Critical grade, internally mounted rectangular exhaust silencers with vertical discharge
- 2 m high vertical discharging exhaust stack with rain cap located in radiator discharge area (optional to mount rain cap only)

**MODES OF OPERATION**
- Provides for single unit stand-alone operation, island mode paralleling and load sharing with other power modules, and single unit-to-utility mode paralleling for base load control (with open transition between paralleling modes)*
- Island mode paralleling features:
  - AGC-4 control allows single unit to connect to a dead bus
  - Auto synchronization (voltage & phase matching)
  - Load sharing (kW) analog signal (like units & legacy compatible)
  - Load sharing (kVAR) analog signal (like units only)
- Utility mode paralleling features:
  - Auto synchronization (voltage & phase matching)
  - Base-load control (selectable: programmable set-point or potentiometer adjust)
  - Soft load/unload (programmable, shared set-point)
  - Power Factor control (programmable set-point)

**EMERGENCY STOP PUSHBUTTON**
- Single emergency stop pushbuttons (ESP) located on rear face of generator set controls area

**TRAILER (optional)**
- Three axle with Anti-lock brake system
- Goodyear G314 295/75R22S Load Range G

---

**X Q 1 4 7 5 G R E N T A L**

LEHX0021-00 6
### OPTIONAL FEATURES

#### UTILITY MULTI-FUNCTIONAL RELAY
- Intertie protection provided via utility grade Basler BE1-11i
- Provides the following utility/intertie enabled protections:
  - 25 (sync-check, utility mode)
  - 27 (under voltage, 2 stage)
  - 32 (rev. power)
  - 40Z (loss of excitation, impedance based)*
  - 47 (neg. sequence over voltage)
  - 51 (phase, time over current)
  - 51N (neutral, over current)
  - 59 (over voltage, 2 stage)
  - 81U (under frequency, 2 stage)
  - 81O (over frequency)
  - 60FL (fuse loss, ‘major alarm’ LED - no trip)
- Modbus interface via 485 serial connection
- Real or Reactive Load High Demand, ‘minor alarm’ LED - no trip, requires site-specific setpoint values programmed.

- Standard for N. American rental market

#### TRAILER
- 3-axle chassis
- Ladders, handrails, internal storage provisions

*Exclusive Caterpillar Intellectual Property*
RATING DEFINITIONS AND CONDITIONS

Continuous — Output available without varying load for an unlimited time. Continuous power is in accordance with ISO8528, AS2789, and BS5514. Fuel stop power is in accordance with ISO03036. Natural gas ratings have been established on natural gas with net calorific Low Heat Value (LHV) of approximately 35.6 MJ/Nm³ (905 Btu/cu ft) and 80 Methane Number (MN). For values in excess of altitude, ambient temperature, inlet/exhaust restriction, or different from the conditions listed, contact your local Cat dealer.
